

You want to take your career in a greener direction in 2017? But how do you get there?

Whether you're a recent graduate or an experienced professional, acquiring the internationally-recognized LEED Green Associate credential is the key first step in establishing yourself as a serious green building professional.

The amount of Green Building Activities in Hungary is growing as can be seen below:

An increasing number of projects is specifying the need for expertise in LEED, so earning a LEED professional credential increases your opportunities for employment, job stability and promotion, while underscoring your value to LEED project teams and sustainability-focused organizations.

Who can benefit from becoming a LEED Green Associate?

Widely-recognized, a variety of professionals holds the LEED Green Associate credential, both in and outside of the green building industry, including:

- Architects
- Engineers
- Interior Designers
- Project and Facilities Managers
- Real Estate Agents
- Product Manufacturers and Representatives
- Students

...and anyone interested in a career in the green building industry

You want to get there, but how do you prepare? BME Mérnöktoábbképző Intézet can help.

LEED Green Associates earn their credential by passing a two-hour, computer based exam comprised of 100 randomly delivered multiple-choice questions.

To help you prepare for this first big step, BME Mérnöktoábbképző Intézet is collaborating with [Green Living Education](#) to offer you an online course to prepare you for the Green Associate Exam.

This course will **start on July 19th**.

The course combine recorded videos you can watch on your own time with an innovative communication platform allowing a high level of interaction between participants and the course teacher.
